

# simplifying Security

## Project Information

- **Project Title**  
East Yorkshire NHS Trust  
New Eye Hospital
- **Client**  
Ashworth Electrical
- **Value**  
£30,000
- **Discipline**  
Security, CCTV, Access Control

## Project Details

The Newly built Clinical skills, and eye hospital building is the latest addition to Hull Royal infirmary and East Yorkshire NHS Trust.

GB Integrated Systems were appointed specialist contractor by Ashworth Electrical to deliver the security, access control and CCTV project within a budget and without compromise.

GBIS worked alongside the design team

in order to fulfil the clients exact requirements. The whole system consists of a Europlex 3GS integrated Intruder alarm, access control, and DDA compliant door entry system, with VCL dome cameras all linked back to the main security control across campus.

The whole system will work stand alone or as part of the campus wide scheme with over 3000 staff it was critical that everything worked first time.
