- Project Title
Canopies UK
- Client
Canopies UK
- Value
£7.5K
- Disciplines
CCTV & Door entry systems.

Project Details

When Canopies UK decided to have their new purpose built building designed and developed in the heart of the Northwest and on full view of the passing commuters on the M65 they employed GB Integrated Systems Limited direct for their security.

GB Integrated systems installed a full CCTV system comprising of static overt type cameras covering specific key areas of the new building

All the cameras were wired back to a single point and connected to a digital video recorder (DVR) and central monitor so that the staff can see all the cameras all the time.

In addition to the CCTV system GB Integrated Systems also installed an Audio and Video door entry system so that all visitors can be catered for and access granted remotely.
